Bloomberg

The screenshot shows a Bloomberg news article. At the top, there's a navigation bar with 'Bloomberg the Company & Its Products', 'Bloomberg Terminal Demo Request', 'Bloomberg Anywhere Remote Login', and 'Bloomberg Customer Support'. The article title is 'Rakuten Symphony agrees to acquire Robin.io' with a sub-headline 'February 28, 2022, 7:30 PM GMT+8'. To the right of the title is a 'Bloomberg Television' logo with 'Watch Live TV' and 'Listen to Live Radio' buttons. Below the title, there are social media share icons (Facebook, Twitter, LinkedIn, Email, Print) and a 'Share this article' section. The main text of the article is partially visible, starting with 'Rakuten Symphony agrees to acquire leading US-based cloud technology company Robin.io to deliver highly integrated telco-cloud for mobile'. A list of bullet points follows: '- Focused on reliable high performance, cost efficiency, multi-domain automation', '- Delivering on today's mobile operator needs in the simplest way and preparing for the next generation of 5G and Enterprise cloud-native deployments & operations', and '- Partha Seetala to lead Rakuten Symphony's Unified Cloud business unit'. The article continues with a paragraph starting 'TOKYO and SAN JOSE, Calif., Feb 28, 2022 - (ACN Newswire) - Rakuten Symphony, Inc. today announced an agreement to acquire leading Silicon Valley-based cloud technology start-up, Robin.io. The addition of Robin.io's multi-cloud mobility, hyper automation and orchestration capabilities to the Rakuten Symphony portfolio allows the creation of highly efficient, consistent high performance cloud infrastructure and operations, from edge to central data center.' Another paragraph starts 'Collaboration between Rakuten and Robin.io has already been underway for more than two years, since Rakuten Mobile leveraged Robin.io in production for the Japan deployment of the world's first end-to-end fully virtualized cloud-native mobile network(1). Understanding the high performance requirements of mobile radio and network applications, combined with the need for financial efficiency and automated operation for scale, enabled Rakuten Mobile and Robin.io to create a complete cloud-native offering to deliver and manage the most demanding applications of this and the next era. Now, Rakuten Symphony and Robin.io are coming together to further accelerate and strengthen the complete end to end automated cloud offering for customers across the globe.' A final paragraph starts '*Edge cloud requirements are unique and critical as mobile operators transition to 5G: The next era of digital experience requires another level of performance, responsiveness and consistency that enables telecom operator and enterprise transformation to be safely accelerated while creating a platform to support the next 10 years of experiences. Robin.io's cloud capability is proven to be effective for the most demanding workloads in mobile and we'.

The Factiva navigation bar includes links for Home, Search, Alerts, Newsletters, Analytics, Companies/Markets, and Labs. The search bar contains the text "Rakuten Symphony agrees to..." and includes filters for "DATE: In the last 3 months" and "SOURCE: All Sources".

The search results show a single entry with the following details:

- Title:** Rakuten Symphony agrees to acquire leading US-based cloud technology company Robin.io to deliver highly integrated telco-cloud for mobile
- Metadata:** 1915 words, 1 March 2022, 03:00, ACN Newswire, ACNENG, English, © Copyright 2022 ACN Newswire All Rights Reserved.
- Key Points:**
 - Focused on reliable high performance, cost efficiency, multi-domain automation
 - Delivering on today's mobile operator needs in the simplest way and preparing for the next generation of 5G and Enterprise cloud-native deployments & operations
 - Partha Seetala to lead Rakuten Symphony's Unified Cloud business unit
- Summary:** TOKYO and SAN JOSE, Calif., Feb 28, 2022 - (ACN Newswire) - Rakuten Symphony, Inc. today announced an agreement to acquire leading Silicon Valley-based cloud technology start-up, Robin.io. The addition of Robin.io's multi-cloud mobility, hyper automation and orchestration capabilities to the Rakuten Symphony portfolio allows the creation of highly efficient, consistent high performance cloud infrastructure and operations, from edge to central data center.
- Context:** Collaboration between Rakuten and Robin.io has already been underway for more than two years, since Rakuten Mobile leveraged Robin.io in production for the Japan deployment of the world's first end-to-end fully virtualized cloud-native mobile network(1). Understanding the high performance requirements of mobile radio and network applications, combined with the need for financial efficiency and automated operation for scale, enabled Rakuten Mobile and Robin.io to create a complete cloud-native offering to deliver and manage the most demanding applications of this and the next era. Now, Rakuten Symphony and Robin.io are coming together to further accelerate and strengthen the complete end to end automated cloud offering for customers across the globe.
- Quote:** "Edge cloud requirements are unique and critical as mobile operators transition to 5G. The next era of digital experience requires another level of performance, responsiveness and consistency that enables telecom operator and enterprise transformation to be safely accelerated while creating a platform to support the next 10 years of experiences. Robin.io's cloud capability is proven to be effective for the most demanding workloads in mobile and we believe it will allow Rakuten Symphony to safely accelerate cloud-native transformation for our customers and prepare the industry for the future," said Tareq Amin, CEO, Rakuten Symphony. "We plan to continue to invest into Robin.io's cloud-native portfolio of products to further advance our capabilities and offer the most advanced and highly integrated cloud platform mobile operators demand."
- Quote:** "I am delighted that Robin.io's technology innovations over the last several years will now get a much bigger canvas to lead the vision for cloud-native transformation for the industry. Our vision to deliver simple to use, easy to deploy hyperscale automation is very well aligned," said Partha Seetala, CEO, Robin.io. "We believe Robin.io's customers will hugely benefit from the synergies of cloud-native technology innovations from Robin.io, and the open competitive infrastructure solutions and global scale of Rakuten Symphony. This is indeed an exciting phase for us as we work together to bring a much larger ecosystem together to deliver higher value for our customers globally."
- Additional Info:** With over 70 patents in the cloud-native technology space, Robin.io offers a highly differentiated and comprehensive product portfolio, including the following:
 - * Robin Cloud Native Storage (Robin CNS) -- An award winning, high performing, software-defined and industry-first allocation-aware storage solution that has been built from the ground-up for Kubernetes.

A quote from Partha Seetala, CEO of Robin.io, is included, along with a list of patents offered by Robin.io.

Rakuten Symphony agrees to acquire leading US-based cloud technology company Robin.io to deliver highly integrated telco-cloud for mobile - ACN Newswire

28-Feb-2022 07:30:49 PM

TOKYO and SAN JOSE, Calif., Feb 28, 2022 - (ACN Newswire) - Rakuten Symphony, Inc. today announced an agreement to acquire leading Silicon Valley-based cloud technology start-up, Robin.io. The addition of Robin.io's multi-cloud mobility, hyper automation and orchestration capabilities to the Rakuten Symphony portfolio allows the creation of highly efficient, consistent high performance cloud infrastructure and operations, from edge to central data center.

Collaboration between Rakuten and Robin.io has already been underway for more than two years, since Rakuten Mobile leveraged Robin.io in production for the Japan deployment of the world's first end-to-end fully virtualized cloud-native mobile network(1). Understanding the high performance requirements of mobile radio and network applications, combined with the need for financial efficiency and automated operation for scale, enabled Rakuten Mobile and Robin.io to create a complete cloud-native offering to deliver and manage the most demanding applications of this and the next era. Now, Rakuten Symphony and Robin.io are coming together to further accelerate and strengthen the complete end to end automated cloud offering for customers across the globe.

"Edge cloud requirements are unique and critical as mobile operators transition to 5G: The next era of digital experience requires another level of performance, responsiveness and consistency that enables telecom operator and enterprise transformation to be safely accelerated while creating a platform to support the next 10 years of experiences. Robin.io's cloud capability is proven to be effective for the most demanding workloads in mobile and we believe it will allow Rakuten Symphony to safely accelerate cloud-native transformation for our customers and prepare the industry for the future," said Tareq Amin, CEO, Rakuten Symphony. "We plan to continue to invest into Robin.io's cloud-native portfolio of products to further advance our capabilities and offer the most advanced and highly integrated cloud platform mobile operators demand."

"I am delighted that Robin.io's technology innovations over the last several years will now get a much bigger canvas to lead the vision for cloud-native transformation for the industry. Our vision to deliver simple to use, easy to deploy hyperscale automation is very well aligned," said Partha Seetala, CEO, Robin.io. "We believe Robin.io's customers will hugely benefit from the synergies of cloud-native technology innovations from Robin.io, and the open competitive infrastructure solutions and global scale of Rakuten Symphony. This is indeed an exciting phase for us as we work together to bring a much larger ecosystem together to deliver higher value for our customers globally."

With over 70 patents in the cloud-native technology space, Robin.io offers a highly differentiated and comprehensive product portfolio, including the following:

News Edge

The screenshot shows a web browser window with the NewsEdge logo in the top right corner. The article title is "Rakuten Symphony agrees to acquire leading US-based cloud technology company Robin.io to deliver highly integrated telco-cloud for mobile". The byline is "ACN Newswire (Published: 28-Feb 2022 5:00, Received: 6:30:33)" and the word count is 904. The main text begins with "TOKYO and SAN JOSE, Calif., Feb 28, 2022 - (ACN Newswire) - Rakuten Symphony, Inc. today announced an agreement to acquire leading Silicon Valley-based cloud technology start-up, Robin.io. The addition of Robin.io's multi-cloud mobility, hyper automation and orchestration capabilities to the Rakuten Symphony portfolio allows the creation of highly efficient, consistent high performance cloud infrastructure and operations, from edge to central data center." It continues with a paragraph about collaboration between Rakuten and Robin.io, followed by a quote from Partha Seetala, CEO of Robin.io, and a list of three key technologies: Robin Cloud Native Storage (Robins CNS), Robin Cloud Native Platform (CNP), and Robin Multi-Data Center Automation Platform (MDCAP). The article concludes with information about Robin.io's current deployments and the role of Partha Seetala after the acquisition.

Rakuten Symphony acquires Kubernetes platform Robin.io

Frederic Lardiere @frederic | 3:27 PM GMT+10 • February 28, 2022

Image Credits: Twitter/ChrisEarly/Google/Ultimedia/Corbis

Rakuten Symphony, the recently launched two-focused arm of Japan's Rakuten Group, today announced that it has acquired Robin.io, a startup that offers a Kubernetes platform optimized for storage solutions and complex network applications. Rakuten Mobile was one of the company's early customers and Rakuten Capital led Robin.io's Series C funding round. Rakuten now plans to integrate Robin.io's tools for multi-cloud mobility, automation and orchestration into the Rakuten Symphony portfolio.

Rakuten Symphony strengthens its market position with the acquisition of Robin.io and its collaboration with AT&T

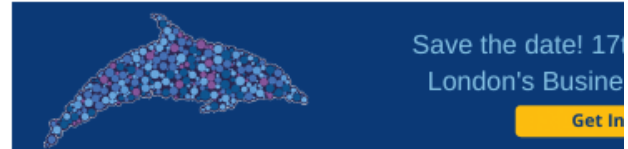

MWC2022 COVERAGE – It would be a bit unfair to simply tell the TeleSemana.com audience not to lose sight of Rakuten Mobile and its “affiliate” Rakuten Symphony in an environment like Mobile World Congress (MWC) where ads with merits abound. mentioned. But, having said that, and knowing the injustice we are going to fall into, we have no choice but to recommend that you, who are reading, not lose sight of Rakuten Symphony, because it is putting together a technological “chiringuito” that seems very interesting for those operators who need to virtualize and cloudify their networks.

Rakuten adds Robin.io, AT&T tech into Symphony

News Analysis
MIKE DANO,
Editorial Director,
5G & Mobile
Strategies
2/28/2022

Just days after reorganizing the leadership of its mobile business under Tareq Amin, Rakuten announced new agreements with both Robin.io and AT&T to further refine its Symphony business.

Broadly, the company's announcements – tied to the ongoing MWC trade show in Barcelona, Spain – are intended to help Japan's Rakuten sell networking software and services to mobile network operators globally.

First up is Rakuten's purchase of Silicon Valley-based cloud technology startup, Robin.io. Rakuten made the purchase through its Rakuten Symphony business. Terms of the deal were not disclosed. However, the move follows the same path that Rakuten took with AltioStar – a vendor it used to build its mobile network in Japan and subsequently acquired in order to flesh out its Symphony strategy.

The image is a screenshot of a news article from ITWire. At the top, there is a banner for 'FORNICE' with the text 'Browse Open a Global Technology Barometer 2022' and 'Looking ahead towards the digital era' dated 29 April 2022. Below the banner is a navigation bar with various categories. The main headline of the article reads 'Rakuten Symphony agrees to acquire US-based cloud technology company Robin.io'. The author is listed as 'By Chris Daughan'. Below the headline is a large portrait photograph of a man with dark hair and glasses, wearing a dark suit jacket. Underneath the photo, there is a short paragraph of text: 'Rakuten Symphony announced an agreement to acquire Silicon Valley-based cloud technology start-up, Robin.io.'

Rakuten Symphony to Acquire Robin.io Cloud Portfolio

Rakuten Symphony and Robin.io are coming together to further accelerate and strengthen the complete end-to-end automated cloud offering for customers across the globe.

Aishwarya Saxena · March 1, 2022

1 minute read

Rakuten Symphony has decided to acquire Robin.io.

The addition of Robin.io's multi-cloud mobility, hyper-automation and orchestration capabilities to the Rakuten Symphony portfolio allows the creation of highly efficient, consistent high-performance cloud infrastructure and operations, from edge to central data center.
